The Advance Threshing Muchinery.

The best and fastest thresher in America, and a machine that stands without a rival. The ADVANCE Thresher has NEVER been REPLACED by any other machine on the Coast, but has replaced several others that HAVE FAILED to fill WAR-RANTEE. Why get some OLD STYLE machine because it is cheap when you can get an ADVANCE on the start and do good work in any kind of grain. You do not rk in any kind of grain. You do not ye to cut and try with the ADVANCE, work in any kind of grain. You do not have to cut and try with the ADVANCE, but start your power, then commence threshing at once. I take the liberty of referring you to the following parties owning ADVANCE. Threshers (without their knowledge): Dr. H. A. Davis, Harrisburg, after wasting most of the season trying to run a cheap machine, bought an ADVANCE and averaged 2006 bushels per day. M. F. White & Co., Dixie, same experience, but after gutting an ADVANCE averaged 2046 bushels per day. Knox Bros., Albany, with a little 28-inch machine averaged 1650½ bushels per day. Knox Bros., Albany, with a little 28-inch machine averaged 1650½ bushels per day. Henry T. Bold, Spangle, writes, after trying a machine the best part of the season bought an ADVANCE. Was then able to run without a blacksm th and carpenter shop. The ENGINE is guaranteed to pull more than any other, and will out travel all others on the road. If you hear any lond boasts, please tell the parties the ADVANCE THRESHER and ENGINE are sold on their merits entirely. And I am-will ug to prove all I claim in any field at any time. Do not be humbugged by buying any machine until you see the ADVANCE. I also bandle steam fitting goods iron pipe, laundry machinery and many other specialties. Send or catalogue of what you want.

for Prohibition.

PROVIDENCE, June 20.—The 4fth amendment to the constitution of Rhode Island—the prohibition ameridment—was to-day repealed by a vote of sees, more than three-fifths of the total vote necessary to carry the amendment. The total vote is: Approve, 28,49; reject, 9863. In 1888 who the amendment was adopted the vote, which was about 14,600 smaller, stood: Approve, 15,113; reject, 9230. The vote will be officially counted helore July 15th, and will be amnounced by proclamation on or before July 20th.

A RIOT FEARED AT JOHNSTOWN

Labor, Practically Suspended on Account
of a General Strake.

Journal of Labor, June 20.—States bodies were
found to day and many of them were immediately
burned, after being completely covered with oil.
The steach is growing daily more sickening and
unbearable. The first clear day here since the awful culamity.

The first clear day here since the awint culturily found the works among the rules practically cusponed, and on the north-pround where have eas so recently introduct capital and shor are wreating is bitter and threatening dutries, and they quiet subtened feeling which has privalled errors the flood is giving way on one improved the flood of giving way on the flood in giving way on the increases of the capital contents and during the day, and to-night a free flight-occurred. All of the idle men who can get introducted are driving the day, and to-night and a thousand or more men have been amounced to night that the stife which began this morning was declared off to-night, and a thousand or more men have been paid and discharged, but the discharged as yet relies to thandon the place, and the authorities have announced that all idlers must leave early in the morning or else the militia will be called on to drive them tww. In such an ovent account.

of kind find the exact manner is synthetic the strike.
Three earloads of Hallans prived this morning, committee of stelking Hallans personaded them to to leave the train until the trouble is stated, her were sidetracked and bree with strikers. The committee supported at the morning meeting reported in hour later. All the foreign works are the provided to the condition of the bedies taked out to day were a second to be bedies taked.

ing reported an nont later. At the bright were a men-have quit work.
Autong the bodies taked out to-day were a no.ber and two children. The children were locked to the mother's arms.

SAN FEANCISCO, July 20.—Editorially the Examines cays to-day. "The go seroigs of San Francisco has been to-building shown to Johnstown. The city has forwarded \$50,000 for the relief of through the valley of the Cenemacy, while only \$15 000 has been sent to Settlic. It is now advisable that the rest of the relief fund raised here should go to the Sorthern safferers."

Items From the City of Dallas - Hugh Immigration

DALLAS, Or., June 20.

Mr. McDevitt, who has contended to furnish 200,000 belok for the new atores to be executed here during the summer, will some be ready to burn a a.

, W. Coursey's addition to Dallas went off like
, askes, and homes now but on the market a
and addition, some loss of which are already

gone. An interesting three days' session of the Policounty teachers' association is now being hold in the city and much work tending to the benefit of education is being performed. Immigrants are arriving in the town daily, most of them third up timber claims west of here. They all think that the people of this gounty have a boundar in their yet undeveloped timber resources.

Ources.

H. O. Date, a whilom shoriff of Yambili county, ut who has resided on the farm of Judge it. F. tolses, near this city for the last four y ard, died here Tuesday night. He has not been in good walth for a tumber of years.

Dalias has yet to fears the value of avertuing. Some little work has been done in this line within the past two weeks, but more must be done, if we wish to attract innessignation, and every estiment must ranket in every way passible.

Twonty new residences are now under way or will be meeted during the coming animal, some of which are to cost a considerable sum of money. Those now nearly firstled are the property of Mr. Hubbard, J. W. Crider. Henry Hagood and

Dr. Hayter.

The reliced from Yaquina via Luckiamute rails, ballas Spring Valler and Salem to a point on the present narrow gange is now nearly an assured fact. This will be a diesting to the country through which it is intended to run, as it will travene some of the finest wheat growing sections of the state and pass through some of the best timber belts in the Coast range.

Oute a number of new residents have been

THE FEDERAL CENSUS.

The Imperiance to This Country of Having the Work Well Done.

Honest and Efficient Men Must be Selected to Record the Phenomenal Growth of the Pacific Eleps.

FORTLAND, June 18.

For subjects connected with the administration of the Federal Government are at this tithe attracting more attention than the fourth-coming coness of the United States and it is entirely within bounds to assort that no subject, by reason of its importance, should excits a more wide-spread interest than this same taking of the census. And no seegraphical division of the Republic is more vitally interested in a fair, honest, conscientious discharge of the duties of reasoning, those and collection on the parity of reasoning, those me declaration will held good in relation to the great. North west, indeed of the entire Pacific slope.

which my specialment had excited was not appeared. The old settler and his friends, bucked homes well meaning men "fully alive" to the importance of the work, swere they would trip me up. They employed the gentleman who had been subsect of the county for nineteen consecutive years, theoretical my duplicate rolls on file with the county circle. He made his examination and then made his risport. He end: "I find that Mr. H has visited every house in the county except three, and a hote shows that he met the hadds of these households at one of the small towns, and obtained all the necessary data from them. I also, find, in valuing the not the dollar there would be, if my valuation as the collar there would be, if my valuation to the follar, there would be, if my valuation to the collar, there would be, if my valuation to the follar, there would be, if my valuation to the collar, there would be if my valuation to the collar, there would be more than." The storm was over, and leading mean has county were kind enough to come to county was six my flagoest, except that of shoriff or clerk. My pershual affairs, however, in the mountime had taken such a shape that I was deprived of the pleasure of standing for the legislature and voting argainst the tane worm ticket man. My compensation for the work I did was \$500. The county was oil \$600 square miles in extent, and it is the mileage that psy, not the enummer-

and it is the mileage that pays, not the ennumeration.

Not take another case. Four years afterward I hoppened hir? with an excessing marshal of one of the southern counties which numbers its square miles by the thousands. His compensation amounted to semething like \$9900 if not more, and he did just exactly, according to his own confession, what the crappled old settler in mycousty proposed to do—when he keame to a piace of "hard riding" sat down at the foot of a guich and made a hapharaff list of any Tom, Dick or Harry that the first guich acrapes he came across could call to mind.

in higherard list of any Tom, Dick or Harry that he first guide scraper he came across could call to mind.

In the first guide scraper he came across could call to mind.

In the here guide scraper he came across could call to mind.

It help covers the business; men of the Facilic stope to have something to say as to the character and capacities of the men who are to act as census to have something to say as to the character and capacities of the men who are to act as census and apinal and cardiac troubles it would not take the contract to "commerate" the laveless ward in Portiand; act even if there was an elevator in every building in the ward.

But one thing is cretain, ward politicians with "pulls." decrepist wire-workers in archived clary working at easy job, in fact political make shifts working at easy job, in fact political make shifts working at easy job, in fact political make shifts working at easy job, in fact political make shifts working at easy job, in fact political make shifts working at easy job, in fact political make shifts working at easy job, in fact political make shifts working at easy job, in fact political make shifts working at easy job, in fact political make shifts work in the country, are entitled to be maked as "state-builders," ought to take the matter of choosing "caumers, ought to take the matter of choosing," caumers, ought to take the matter of choosing they were right, to the Appointment of a stranger, I have nothing to the short ward to provide the matter of the short ward to take the thing them as warding a short passed on the office of the short ward to take the thing them as warding a short passed on the office of the short ward of the short ward to

Pittsburgh Dispatch.
Thomas A. Edison said in an interview
with a reporter of the Pittsburgh Dispatch: "You ask me about the future of electricity. It is the coming motive power. It will be used on all the railroads some day, but the point is to get an economical engine. My theory is to have immense dynamos located all along the line of the road, and have the electricity conveyer from these stationary engines to the tocomotives by wires through the rails. For example, I would put two big engines between New York and Philadelphia, and enough power could be furnished to whak the limited at the rate of 100 miles per hour."

and enough power could be furnished to which the limited at the rate of 100 miles per bour."

"But this is the point I have been working on for years: to convert heat directly into cleotricity without the intervention of boilers, steam and all that. What an enormous amount of expense could be saved if this could be done. Think of putting something into the heat of that natural gas fire and making electricity out of it. It can be done. I feel it in my bones, and instinow I have a suspicion that I am on the right truck, but it is a peaky problem—one that can be worked out only in time.

"It have been experimenting with an electric road in New Jersey. I had rails laid in they put them down on relivouds, but the machine would run off the track in going around the curves. I then raised the curve to an angle of forty degrees and the motor went around all right. It tooked as if the engine would topple over, but it didn't. You knew in a centrificial machine you can make a circle in the sir without leaving the track

"At the present time the phonograph is occupying my time. I have been improving it, and its more perfect to-lay than ever. In speaking into the phonograph it was soon found that the sibilants were not recorded. For instance, if I were to say species the "en sound would be lest. Well, I have bean

shoal about elglit mites on fathoms of water. If this should prope true, it is fathoms of water. If this should prope true, it is also important it aformation, as it is generally supposed that the water there is much deeper, and it such a shoal expira, it is unknown to most every one and is not idealed on the charts. If have not mot Capthin Bell, and cannot outself or the truth of the story; but I think now he will be interviewed and the belta ascertained.

This whole subject is of vital interest to the people of this coss, and every particle of information is of value, and this is my only excust, at if hope it is a sufficient one, for occupying so much of your valuable space in regard to it. CENTRALIA. June 11, 1859, at this place, needslights attention of I he new college building at this place, needslights attention of Portlane. Duilders, and this people believe it, too. It is an attentive four-story (basement heing counted as one) building, and a to cost from \$0000 to \$12,000. It some firm of builders who are familiar with such work should 1 appent a Centralia before next Saturdhy to secure or overlook specifications and thence would order the building, all partits would be contented. The locality for this Englis, college is on a splendid hill overlooking almost the entire valley, and when campleted Contralia will possess one of the most attactive college addices busides having one of the more important ool eggs in

CHARMING MISS LUCIA GRIFFIN.

The entertainment given by Miss. Lucia Griffin, harmory hall has evening, was in every way a success. Miss Griffin is a fine elecutionist and the perfect control she has of her we can and body induces it easy for her to vividly represent many different characters. Now she throws her sudiqueed into convulsions of laughter as she repeats "The Buby's Solloquy;" then lends them along the highways of mirth and tove as she repeats the "Money Musk," or "The Bobolink," or hurls them into pity and or "The Bobolink," by hurls them to pity and or "The Bobolink," by hurls them to pity and or "The Bobolink," by hurls them to pity and or "The Bobolink," by hurls them to pity and or "The Bobolink," by hurls them to pity and or "The Bobolink," by hurls them to pity and could well a light to mist the many pible treat Miss Griffin has in store for them and we feel assured if abever visits our city real alterior andience will greet ber.

Miss Griffin appears at the New Park to morrow afternoon and eventug. Half the vice eds of the diturnoon entertainment goes to the East Portland Baby Home.

PERSONAL.

Senator J. H. Mischell arrived here yesterday from Washington.

Mrs. G. Kline, of Wallula, and Mrs. J. Isance, of Oakland, are visiting at No. 2312 Washington

Oakland, are visiting at No. 23% washington street.

Mis. C. W. Knowles has as guests at her soaside cottage, Clatsop, Mis. Lola Steers, Miss. Buchanan and Miss Laura Gions, of Oakla. d., Ca.

Mr. B., C. Duniway has been reserved, very sick at his home near Houston, Idiaho, but is now temporarily better. His many friends throughout Oregon will unite in hoping for his complete recovery.

Dr. Emma J. Welty, who has been spending a few weeks in Northern Idaho, Co at d'Alene and vicinity, has returned home. She is mecompanied by Mrs. W. H. Marshull, of Spokaho Falls, who will remain with her on a visit. BOLK CORNER TRYCHERS, INSTITUTE

POLE OODNEY TRACHERS' INSTITUTE
A correspondent, wilting from Dallas, Polk
county, under date of June 19, says;
The Yolk County Teachers' institute convened
at Dallas to-day. Thirty-dive teachers are enrolled
already, and many more will arrive to-morrow.
The faculty of the State Normal school at Monmouth and Professor W. N. Hull, cf the State
Agricultural college, are instructions.
Superintendent W. I. Reynolds has spared no
pains to make the institute a success. The Polk
county teachers are awake and are possessed of a
progressive spirit.
To-day's session of the Institute has seen an enclusial size and pro Itabic one. The institute will
continue in session two days more.

WORSHIPPING IN THE GROVES.

An old-fashioned camp meeting will be held inear Oregon City, communiting fune 27 and continuing over two Sabbaths. The Facilic annual conference of the Western Methodist convention of Arberica will be neld on the grounds during the specifing. Ministers from Cal fornia and Washington are invited.

The fourth quarterly meeting of Washington circuit. One on conference United Brethren in Christ will be held June 22 and 2, at Liberty Class, mine unless from Fordani, on the Tarlor Ferry read. Hishop Secken of Oblo, will be present. All are invited. present. All are invited.

Good News for the Flutcorats.

N. Y. Letter to Ballimore American.

With itrice at the head of the democratic influence and several other williomates on the committee as consulting members, the democrats will probably be silent as to the corruptive propur of money in methoral elections. For its apparent now that wealth has been the controlling desideratum with the democratic committee in the selection of a head.

A few days ago a very serior s accident occurred at Needy, close to the school house. Thomas Sconce, accompanied by his brother, William, and Mis. Wyisnd, his wife's mother, started for Mr. Frady's to pick cherries. When just opposite the school house one of the horses became frightened broke it and they were left yowerless. William inneed and was little hunt. The team rushed on said the wasgon struck a log juit as Tom we jumpling, throwing Mrs. Wyland of and bruising he tirriby about the head and face. Besides the bruises she has one great cut on the head, She will, however, recover, The wagon gridently atruck Tom as he jumped, knocking him beneath the wheels, passing over him across the back, causing a serious hujury to the spine, which reachers the lower extremelies helpless. His entire recovery is doubtful, though he may live for years a cripple. He was taken to Whiler Koblevts, where he was made as easy as possible.

BELLS BROTHERS CIRCUS It Will Appear in This City on Monday and Tuesday of Next Wook.

The San Francisco Bulletin has this to say of Sells Brothers' and Barrett's great direus, which is to appear in this city next Monday and Treeday. An andience of four or five thousand people witnessed the opening performance of Sells Brothers' and Barrett's circus. The programme included everything ever done in a circus and some things that had the tharm of naveloy The introductory march shows the magnitude of the establishment. A finer display of horses or more tastefully dress of riders would be hard to find. There are so many acts that but a minute or so is given to each. A performance is going on in the three circles at the same time.

Antigenic selection of the control of the circles at the same time.

Antigenic convey but a faint lidge of the performance that a walk around the outside of the performance to the control of take a walk around the outside of the rings. Comic mules show that the animal has a latent souse of humor. After a little tight rope dancing, landella Dutton in one ring and Allie Jackson in the other, gave a graneful menage act. Some good vaulting follows, one of the vaultors going over five elephants ranged side by side.

Wim. Blowles and Wim. Sells the some wonderful feats in the way of bareback riding. A backward some smult, coming down on the hores and keeping their feet is one of them. The Bellowes family only had shout three metric more. I also Ashibitions and gladitorial exhibitions iollow in such rapid succession that the audicine has natime to think what will come next.

One of the most remarkable exhibitions was given by the elephant, Sid, with her trainer, Lew Smulin. The entertainment toosely hit a series of ruces, including a gentlem in jeckey rure, sully race, pony race, man against horse, ladies' flat race, clown carnival race, English hurdle race and algorithm of the profounce of the contains about every spec contains allowed every spec contains.

A BENEFIT TO JOHN LETCHER.

John Cort, proprietor of the Standard, with the many friends of John R. Letcher, manager of that place of amusement, will tender the latter a benefit Friday evening, June 28. A large humber biase volunteered their services, Among them being Jack Dompsey, Denny Costigan and Daws Campbell. The latter will do his cayer club swinging act, while Demp ey will act as master of ceremonies. Costigan will spar with an "unknown."

Carloads of Machinery En Route-

A Quarter of a Million Dollars Expended in Got-

The frame work for the immense cawmills of the Grand Ronde Lumber Company has been fin-shed and the arrival of machinery for the same is the Grand Ronde Lumber Company has been flished and the arrival of machin ery for the same is expected in a few days. This company has already expended a vast amount of money in getting ready for operations, having changed the natural course of Grand Ronde river, for a mile and a half, creating a mill pond cepable of holding 7,000,000 feet of saw logs. Their next improvements will be in establishing flood dams in the tributaries of Grand Ronde, in order to drive logs at all seasons of the year. A great portion of their best sawing timber will come a distance of about twenty-flip in miles from a region, which it is estimated will furnish 860,000,000 feet of lumber. It is the expectation to have the plant ready for operation during the coming fall, and by that time the company will have expended fully \$25,000. For carloads of macintery are on the road from the East. This macintery includes engines and boilers of an aggregate expectly of \$00 harse power. The company will employ about \$20 men, and expect an output of 200,000 feet of lumber daily. All the lumber will be seasoned and dressed before shipment, giving additional comployment to a young army of labo ers.

The establishment of this wast enterprise has had a very appreciable effect in La Grande, and is only the starter of a long fer a for manufacturing industries that are sure to follow. The natural facilities which La Grande, has for the establishment of manufacturing enterprises are naccolled, and this alone would suffice to make La

Some Further Universalist Arguments in Reply.

FORMAND, June 20.
TO THE EDITOR OF THE OREGONIAN:
In regard to 'E. C. F.'s' acticle in this morning's Oregonian answering a former communication of mine, permit me to say that no Universities believes that the orthodox saints will be re-

No man is whonly bind—the worst animals, in the Pennsylvania penitentiary gave all their prison savings to the Johnstown anferers.

I repeat that we believe that every sin receives its punishment, but we do not think that any finite sin merits or will receive infinite punishment—necording as men improve their time and faculties in this life will 'they be prepared for greater enjoyment in the future, and as they neglect them to the same extent will their happiness be lessened in the hereafter. Paul tenches this with no says: "As one six differed from another star in glory so when he speaks of Christ as the "man of the "man of the "man of the saviet of the whole world," which certainly does not mean that the greater part of the world will not be saved.

It is immaterial whether the "orthodox hell" despite the property of the world will not be saved.

It is immaterial whether the "orthodox hell" despite the price or "state of existence," as "E. C. F." is nleased to call it. I think, perhaps, he is right; that it is "state of existence," which will cease to exist when all that are in heaven and on the earth fall down and worship at christ's feet, as we are told they will.

On my main point, however, "E. C. F." agrees, with ne that "God wills that all should be saved, but adds that God cannot save man agains his own will, as two opposing wills cannot remain is opposition to each other always. One of them must break the other. "E. C. F." professes to believe that man's will to be damned is strouger than God's will that he should be saved with the steending result that man, is damned. Universalists believe that man's simple, will will by working in them either here or hercafter a bester will.

What does I Timothy, chapter it: verse 4, say?

working in themselved netter the terrater's spectrum with a close I Timothy, chapter if: verse 4, say? "Who will have all men savid and come under a knewledge of the themselved that the terrater is say? "God works that his higgs after the counsel of his own will," Therefore all will be saved according to the will of God for he worketh all things after the counsel of his ewn will.

AFORMA, June 19.

To THE EDITOR OF THE OREGONIAN:
The communication published in your issue of the 17th Inst., entitled. The Cruise of the Albatross," has already called out some information, and it is to be hoped that it will result in more being obtained. Mr. S. S. Gordon, writing from Astoria in your issue of to-day says. "If I had taken the trouble of interetewing Capitain Tanner I would have learned that the Oregon coast had been carefully examined," sad that so far as had been carefully examined, "sad that so far as had been carefully examined," and that so day were some information. I wish to say that in writing the communication to Tix Oregonians, I had no intendien of reflecting upon Capitain Tanner or the officers of the Albatose, my sole object be ag to draw out information. Now, I am informed on my arrival here, on good authority, that they did succeed in catching a true codish on the "Heceta bank," also halbut, Although the exports on the Albatross had doubts about there being any priper halbut, on this part of the coast, they were compelled to admit the last when the Marazine and pelled to admit the fact when the Marazine had one to the coast of the coast of the cast them with proper, "Poor the Albatross may remain on this coast until one can find out and show them all there is in it. The impression among trost people is that she was sent hore to find out those facts and inform us.

I presume the whole trouble is that the results of the investigation which she is making, must first be forwarded to the head of the propur department at Washington, and the next generation may have the benefit of her work. It will be good veading some sine in the next generation.

AN UNIUST RULING. Bysecial spaces of the tempotry department report from Taxes that high people leadt over imported from Mexico are mixed by the important with low grade over for the jurpose of houseing the percentage of salver, space is the over may came a free of duty. The customs officers have ratured these goes free administer, and this important have expealed so Washington. This action will oring the land question before the treasury department in a sew form, and very probably will restly in a decision which may greatly restrict the importation of lead over into the United States.

respit in a decision which may greatly restrict the importation of lead over into the United States.

The ruiting under which lead over are now reducing late the United States free of duly said demorality late market for the home product was made by Air. Cleveland a secretary of the treasury. Under this decision all lead are somisining silver, the value of which is greater than that of the lead, are anlowed free entry. The decision as the Chicago faster force excitains, "was flagrantly unjust, because it imposed a fast upon over imported by private persons or by inter porated companies diametrically apposed to the test which the United States imposes upon ones received at its mints or at its easay offices. It makes one standard of quality then the gyreniment if a purchaser and another standard when a stuject of the government is purchaser." The former rule was that "the product of ore: smalled and reduced faculty of the value of the respective meta, a therein contained." But the lette secretary reversed this, and established the rule that "the classified in which the the secretary reversed this, and established the rule that "the classified according to the prethis, and established the rule that "the classification of ones minst depend upon the question as to which had the chief value. That is to say if giver is the chief value the ore is duty free as all year ore, had it leads the chief value it is liable to duty as load ore. Under this decision ores that are imported beginse they, are lead ores and because a market is wanted in the United States for

the load are admitted to entry at the custom mores as silver ores. This is not honest business, and there is no wonder that the lead producers of the United States are not satisfied with it. Some of the consequences of the labe secretary's railing are thus stated, viz: Tairty milliens of dollate invested in United States matrix which furnish [57] per ce at of the leeight of the Western divisions of the Union Pacific and Rio Grands railways, the wares in many thousands of miners and of, purhops, an equal number of freignters, and teamsters, the business of a secret of Carrying teamsters, the business of a score of thriving source, and the prosperity of several states and territories are threatened with extincand, territories are threatened with extino-tion or reduction by this most fooligh and manifolms ruling. The ores imported through it! Pass shorts in 1883 should have yielded a revenue of 21,781,300 to our Gov-arment. Bones of our way mines and smalling works were closed, others, ran on half sine. Dor half time. But the owners of Mexican miles sold more ore to American and did not raise the wares of their emiscrable peons." Itseems very plain that this treas-ary raing outht to believersed.

the land are admitted to entry at the custom

POLITICS AND PRINCIPLES

Hypercriticism, of a certainty, is not direct to dad anything wanting in recent remarks on the grange made in these columns. But then there are people expable of heing hypercritical on occasion. Ottoon could have benefited by the grappe movement much more han has been realized, had that movemore than has been realized, had that move-ment he en threed and conducted with ordi-nary business judgment. Unfortunately, the leaders of the order in early days were enthickness was sensely who expected too much and promised wildly. When expecta-tions wars thwarted the movement wint becoming a festing it had advanced until only a more nucleus was left as a foundation to buildly a festing it had advanced until is build upon. If the rebuilding is really under way it is to be hoped that experience will be a guide for rational management and the order will not be responsible for visionary schemes and quixotic efforts to rule the Reasonable efforts to reform abuses are

Reasonable efforts to reform abuses are always in order, and such reform as only accomplished, by calm and process affort. In both politics and trude there, is a demand for research against combinations that seek to rule or monopolise. The granger, or indeed any farmer, can lend his physics to secure such aprotection, but a with consider will find where steady and determined effort must. In this success. If the grange has a sarred life much the descent will not be thrown away. The grange should keep out of politics, in a measure, while it can formulate ideas and declare principles fact individuals pan sock to commit all particules. Party is one thing and principle another, top often. Any accomplish grant good principles and make parties responsible for them, will be a political power without being partisan, and may accomplish grant good.

ANOTHER GREAT DISCOVERY.

A new process of producing white lead, known as the Handay process, has been patented in Great Britain, and applications have been made for obtainment of similar patents in all the principal countries of the world. The process, it is not doubted, will world. The process, it is not doubted, win revolutionis; the white-lead industry, com-pelling abandonment of the old methods of production, giving 3 cherper and better article and doing away entirely with the un-healthful consequences to workmen which hitherts have always attached to the manu-facture of white lead.

which, after being ground to powder, lixi-viated and dried, form the white lead of compaerce, the entire process occupying shout four months. The process is themely hursful to workmen, since they cannot avoid inhalation of poisonous gases, and few can survive in the occupation for

aby considerable length of time.
Under the new process, lead ore direct
from the names is placed in the jurnace with
live cake, and by the action of a blast of sir, is driven into vapor, and exidized to sul-share of lead, which is collected by a special condenser, washed with dilute acid and fried. Having been condensed from vapor, the white lend to obtained in a state of fineness exceeding that obtainable by the ordiprocess of conversion is instantaneous and continuous; as the men are shooting the lead one into the furnace at one end the pumps are drawing off the wet white lead at the other. Then it is simply, washed and direct, and can be sent into the market within factly eight hours. It will thus be sent that inseed of a period of three or four that inseed of a period of three or four that inseed of a period of three or four ment that desceed of a period of three or four montas, and the employment lof expensive chemicals and labor as required by the old process, the site is converted by the new process into white lead at once, and the materials employed are colorise at find, and air as an oxidiser. No skilled about required the polarhous fumes are all discharged high into the air, and the process is entirely in-

The success of the process has been fully appropriated. Extensive works are already in egenetics at Glasgow, and their capacity is at once to be largely increased. It is be-

once, as well as into other countries, since not only now early afford to evanulacture white lead by the old process. A presister treat of this discovery will be another great monopoly that will lest full patents expire; but there will be compensation for this in great reduction of the cost of white lead. Thus far it has been proven at Glasgow that white lead, which has been refling there at ±18 to £19 per ton made by the new process can be sold at a profit for £40 to £12.

Thus it seems to be rectiled fact that an other, very important branch of industry, and the market for another highly valuable product, are to be revolutionized, by a new discovery, almost, as important as that which gave Bessemer steel to the world. Our own country, as a great producer of lead ores, and the ingress consumer of white lead in the world, will be deeply intorested in the development of this new process and in its introduction here.

on land that in 1878 was included in Warner lake. Lakeview was once built on Goose lake, which now to five miles away. Malhour lake is seight feet lower than ever wath known. It is said that thembold take in Nevida, that was once sitteen to eighton miles long and eight to treate miles vide, is now a few nitles lorg and a falle of so wide. The himbold rives no longer is tributary by the take. This lake is incertain, for ten

years ugo it was its now, while only live years ago it was as high as ever it was known to be in the past. The early immigrants said tho

One of the most hopeful signs of the grow

people have been in the main loo proud to use the pount in a ourness transaction. New England has, in the mountime, on-joyed property and deled out the pennies. It is believed that the introduction of the savings bank system will enquarage habits

of thrift in this section in the saving of small some, without which the masses in

any country cannot expect to make adequate provision for the winter of life,

Bane of the oaks that grow on our Oregon nills must be very old. One such can be shown that its six feet through the butt, and

its age would be a question worth answering.
At Waltham, Mass., they recently cut an oak

fice and ancient when the Mayflower buffeted the Atlantic with the Pitgrim fathers and their plunder for its cargo. Oaks grow slow-

A question that is likely to disturb the de-

liberations of the constitutional conventions to be held in territories where mining is an

to be held in territories where mining is an importunt factor of public prosperity relates to the tagation of public prosperity relates to the tagation of pines. In Idaho and Monlana, is well as in Washington, mining is an Important resource, and the matter of raising revenue involves their taxation. There is no reason why a producing mine should not be taxed, and as far as regards the uncertaint of mining. It is not more unnertain than stock raising, or, indeed, of farming or business in general. The miner

concertain than stock raising, or, mused, or faming or business in general. The miner is more apt to need the protection of law than the stockman, the famor, or the mer-chant, and should be as willing to pay laxes.

The constitutional convention will be able to say how he shall be taxed, but that he should be taxed is above question, if he wants the protection of law.

Mr. R. Fulton; manager of the Cambria

Iron Works at Johnstown, said in a recent

Journatism over at Seattle is on the qui virt. and it is well and good that the art preservative of all ares should assert itself in such an emergency, and let the world see that it is alive, and activity so, when a calamity like this our overlakes a city. The four daily journals are not only already re-vived; but have wonderfully regained their vice anit force. Never a better proof of liv-ling force was seen or known than when a ing lotce was seen or known than when a newspaper, so quickly and actively spreads its wings and regains its position. It is wonderful how, the active spirit of aggressive power is brought out of such a ambidering rum as that which overwhelmed the city of Scattle. We cannot say such a callastrophe was necessary, but its influence will be left in permainent enterprise and congenial efforts. The Harney Hereid says that not over four miles of the original bod of Warperlake is now covered with water, while in 1875 water stood seven tech deep where now it is dry hand. Lists year 300 toin of lay grew on land that in 1878 was included in Warner.

Colonel Charles A. Wood, late president of the territorial council of Idahe, and mem-ber elect of the constitutional convention, d.ed at Salmon City a lew days ago. He comminded a Wisconsin regiment in the

At Vancouver the Fourth of July will be celebrated in unique and attractive style. Hersons who are looking for something novel in the way of a celebration should read the programme for Vancouver as advertised in The Original No.

ni the pust, if accurry mining wolume of water into that lake. While the Humboldt has its ups and downs, our Oregon lakes seem to thuse prematurely reduced their volume. It is well known that caldination. Peter H. Crawford, who was born in Scottime. It is well known that cultivation, cutting of forests and the framining of the surface here have chused streams and aprings to lower so the transing of the ground by the great heads that pasture around the lake country, may have caused the receding of the water. Cartain it is that the surface packs harder by tramping, and there the been a great deal of it done. land in 1818, and came to Oregon in 1847, died a few days ago in Clarks county, W. T. An older brother, Alexander Crawford, still lives near Corvallis.

A TWENTY YEARS' EXF'. RIENG.

A latest at 5 ANBORN, VALL & 60.3 16142 state, but for the fact that we really could not get along without it, without serious detriment to our boys and youth.

Civil Service Commissioner Roosevelt has advanced a new idea in relation to civil ser advanced a new idea in relation to civil service requirements. It is that the laws in the premises are obligatory and not optional. The consternation in official ranks consequent upon this bold assertion is great. Postinasters and their subordinates regard it as an assurpation of power, sufficient to justily an officeholders' rebollion. Do this less many of them will second from the service of a greatment of unwrateful and wice of a government so ungrateful and leave it in the lurch without giving its exacting minious a chance to report upon their qualifications or lack of them.

The Albany Deriverat, having remarked that "Cleveland removed officials when the public service required it," and having been asked to state how or in what way the pubtic service required the removal of the col-lector of customs at Portland, the marshal and collector of internal revenue for Oregon, dodges that issue as one that is inconvenient to meet. It was the dishonesty of Cleveland's practice of pretonding that the public service required the removals he made, more than the set of making the removals; that gave offense to all who despise hypocrisy.

THE STEAMER ALBETROES

A Very Einely Equipped Vessel for the Service Required.

Observations Taken by an "Astorian" Reporter Who Inspected the Breamer Thronghout-Graguic Description of Sec.

The following observations of the United States sleamer Athatross now at Astoria, nere taken by an Astoria reporter who was shown through the vessel by her mester, tepters Taunor:
The noticeable feature of the Athatross, apart from her strength and compactness is the expangement amidships, which is devoted to the practical work of the instructions and professional gendements this secondary the expedition. The Athatross was built under the alrest personal supervision of Captain Tauer; and is the resulting the construction of the professional control experience in this repartment of public service. The vessel sind her cruite are for the development of knowledge concerning the donst, deep sea explorations, and their probable value, the habits, etc., of deep sea fisher and a multility of minor duties that basily all every hour of other and outposed.

Descending from the wayer deck, is found as

when Raby was cick, we gave her Castoria; When she was a Chitid, she cried for Castoria; When she hecame hiler she clung to Castoria; When she had Children, she mye them Castor

CHARITY AND POLITICS.

The expose of the atrocities of the Insane saylum that has recently created a sensation in Chicago has demonstrated forcibly the necessity of removing public institutions of charity and humanity from the control of partisauship. It is had enough when the management of the public schools of a city fall under the dominion of helish and cor-runt men, who do the disreputable bidding of low politicians for a price; bad enough when the police lorse of a city is forced to work with might and main on election day for political bosses and submit to a heavy assessment upon their salaries to pay the according expenses of a municipal campaign conducted upon such a basis; bad enough, in all conscience when the usofal facilities of in all conscience when the postal facilities of the nation are hampered and embarrassed by the peculiar excise laws of corrupt partianship. But infinitely worse than all of these is the dominion of politics over the humans and charitable institutions of the country. As often as such institutions fall under the searching ore of philanthropic investigation abuses are disclosed that disgrace the name of bumnnity and arouse the

of a great and progressive city and state dis-closed a condition covering a period of months, the elements of which were starvation, beating, kicking, choking and murder, the subjects being he pless maniacs and harmless simpletons whom "political influence" had given into the charge of bullies, who had proyed the value of brute strength at the polle; and of inhuman weetches who were long over-due at the state's prison for frauds and other crimes perpetrated at the

character sufficiently gram to justify the calling of a special session of the legislature to devise a remedy. The enormity of the abuses disclosed by the investigation can be appreciated when the vast expense attendant upon a special session of a state legislature

The details which have been given to sure public are sufficiently revoting; to warrant prompt action in the premises, regardless of cost. Added to this is the conviction that the half has not been told, as how, indeed, could it be, when the victims of this gross in the could it be, when the victims of this gross in the could be a sure of the humanity are maniacs or feeble-minded creatures, devoid of memory and scant in

understanding.
One of the most scored and imperative One of the most stored and imperative duties imposed by humanity is the care and protection of the lineane. Thrift gives willingty of its stores for this purpose and philanthrophy boasts of the benefits that are conferred in its name. The potent power known as political infuence, however, too often baits its venal trew upon the substance of this charity and abuses that cry to heaven for vengeance are the result. Bither philanthrophy, should cease to sleep upon its important watch at the postals of the asylums for the insure and didule, or it should revise its code and administer to the misercrucles of misfortunes a quicking potion that will kindly remove them beyond the reach

NOTE AND COMMENT.

At Wooster, Ohio, Mrs. Ellen Rinckle is regu-rly ordained a minister of the United Brethren senomination and marries people of hand as ac-ively as anyone. Spokase has alady minister-ing the Gospet there, a Mrs. Joses, who performs il ministerial duties. Why not preachers of the gospet as well as ductors and law yers?

Scattle has improved the according to send off many had characters that have infested that place, and its treat of fire has resulted in weeding out much objectionable material. This unfortunately cannot be kept up for as soon has the state of civilization permits such adjuncts there will be gauther influx. It is a good thing to be well rid of them once, though the purification cannot be becomeanent.

of them once, though the partification cannot be permanent.

Three New York dontors have been indicted for causing the death of Washington Irring Bishop, the mind reader, whose relatives doin that in had put himself into a casleptic transe, when the doctors got hold of him and held an autopsy on his remains. Goorge Francis Train and Dr. Isaner are trying sensething of the kind and should be warned in time against the biundering of such professionals. The most restouched course for a han to pursue is to stay three aid eep sware for a han to pursue is to stay three life keep aware and is ever out up by mistake, or buried alive.

The Mayacobusetts legislature passed an appropriation of \$50,000 for the beauty of the Johnstown sufficients, but the attorney general of that state as pronounced the act unconstitutional and the money will not be sent. This is a hardship to many people in both places! Many at Johnstown re or will be in meed of relief, and many Misseathnetts people may feel designs of ading the significant of the sent of the se

If reasons were "as plenty as blackberries an average Washington toritior, edition would not give one unless he fult in the humor, but l'asco has a reason for being a caudidate for the seat of government for the new state and gives it in a manly way. The reason is because every pound of freight destined for l'eigot asonud must pass through l'asco to get there. This should be satisfactory to l'aget acute and its desire should be to placate l'asco since it will have opportunity "to gettrough" all goods that to through l'asco. The citizeus of the city of the p ains, state their superforposition plainty and evidently intend to make a capital thing of these leading qualities. If not why not?

A man who is overwhelmingly possessed by a spirit of self-abnegation and whose life sent a valuable to him as devotion to family is attong and assertive; makes the superintendent of prisons, at Albuny, Nuw York state, a very liberal offer. As to its value, one cannot "judge," save that it sail be has to give, and more than the varyer of the first of the factor of matrix to the control of the fact victor of the fact victor of the fact victor of the fact victor of the family and he is pact; so if the state will pay the widow and children \$5000 he will give his life to scionee.

Ex-Senator Sabin has obtained a divorce from his wife because she is a drunkard and lakes morphine. He is very wealthy, and they have lived together for twenty years. It seems to the world that he should have a desire to care for and protect her from herself not all evil habits rather thank to the her had said evil habits rather thank to the her had said evil habits rather thank to the heart of and day her to destruction. There has been seen to the her to destruction. There has been seen to the her to destruction. There has been seen to the heart of the hard had been to the heart of hea

and that he is ready to forget his old with and find a new.

Still another special age it will examine the war accounts of Gregon and Warbington in the party days and he like a dhp and distant matter in hand if he attempts to do it. No hashess was ever conducted so changesby and recklessly as the Indian wars that were prosecuted from 1860 to 1856, and late. There were many different agents and each man did trainess to suit his own idea. They bought anything and everything at prices ranging from 10 cents per point for sugar to it a possible. When all were cut down in the same ratio some people were runned and some point ratio some people were runned and some got too much. Now a third of a conjury has passed away and the winesses are often gone with the year. It will hardly be possible to decide what is right and what is wrong and the task of aranining and adjusticating between classimants and the

towernment is one not easily performed with justice. Different circumstances occurred. Some goods were bought from far off markets and cost there more than twice what was paid at Portland and other valley lowis. It is not too late for rescale to make out false accounts and state lasts out; themselves. The task of doing justice involves so many considerations as to seem hop-less of fulfillment. There was a time when the obts should have been paid. Now, calculating interact and compounding it, it would be at least 180, and what sum might be justif due a man would be multiplied thirty times to secure the clasticant what should be his just dues.

whatshould be his just does.

The Kasho Statesman tells of a Wyoming sheep buyer who has bought 22,000 head of wethers to be driven to Fremont, Neb. Boise City is the center of a large sheep feeding region and is visited by buyers in the apring to accomplish heavy purchases. There are other buyers around and the number stated is only one drove. The sheep breeders are making more money, with wool and mution both very low-priced, than those who have horses and cattle. One consequence is that droves of cattle and horses are being sold off. Of late several dr. vex of horses have came over the mountain passes and have been sold at \$90 to \$125 a head. A very fair horse sells at \$60 to \$55, and large work horses of 1.00 to 1539 pounds bring \$100 to \$135.

The San Jose scale is a very scaly thing to bave The San Jose scale is a very scaly thing to bave about, and we have a great deal to hope from the fact that our winter climate will give this pest a cold reception. It is beped that it will not thrive in a climate liable, to cold spells such as we have. For all that is said about the danger to be apprehended from the woolly aphis, it is a fact beyond doubt that they often disappear from Oregor, or hards a quickly as they come, and it will probably be so with the scale, that California has unstadly lent us. The habits of the scale are peculiar, for a Southern Oregon man has found them on a stone and filling its crovices. They infest all sorts of trees, those of the forest as well as those of the orchard, and are about as undestrable as smallpox or measless.

The weather report issued by the signal service

A signal service man gives a politice on weather prognostications in a brief sentence that any man can understand and put in practice. He says: "When you wish to know what the weather is going to be, go out and select the smallest cloud you see. Keep your yee ou it, and if it decreases out to be followed by fine weather; but if it increases, take your overceat with you if you are going away from home, for failing weather is n therefore. The reason is this: When the air is becoming charged with electricity you will see every cloud attracting all lesser ones toward it until it gathers into a shower, and on the contrary, when the fluid is passing off or diffusing itself, then a large cloud will be seen breaking into pieces and dissolving."

The danger and folly of carrying weapons is fillus, rated by several cases on trial in the Oregon courts. In trith, most of the murder trials originate roun the fact that parties who get angry have five-arise in their possession and use them when they are aggrarated. The results are deplorable and often extend much farther than the mere shooting. Take the case of Harvey Ogle, of Salem, killed by Hawkins. Ogle's death was only a single feature of the account. The wife and little ones remain to they are the issue of the area of th

The story of Philip H. Welch, who was one of

port of his Children.

Roger A. Frier was considered the very pink of chivalry so long as he was in the Confederate service and lived in Virginia. But Frior became a New Yorker-from force of remius hecause a metropolis like that city afforded scope for raisen and room for a tion of centius to extend. A rewell to send a few thousands of those fire-caters. North on a mission to learn common sense. A democrat from North Carolina, who lived long at Salem, went back to see bis people a few years ago, and because he had rational ideas they denounced him as an abolitionist. He came become to Oregon and became a republican because he thought he might "as well have the name as the game." That was about five years ago, and the man was considered bitterly partisan here before he returned to North Carolina.

ACRES vs. LOTS.

\$45,000 subsidy raised. The plant already ordered, to be completed by October 1 next.

\$300 per acre, half cash, balance in one or two years at 8 per cent-Five 10-acre tracts left, to be sold this week.

These tracts lie near the new Electric Motor Line, southeast of city, and as near as Mount ! abor. The land slopes toward the west and lies very high, so that every acre affor is a magnificent view of Portland.

The soil is very rich. Land having no better view and at same distance from heart of city, at Mt. Tabor, commands from \$2000 to \$4000 per acre.

The completion of the Electric Motor by September next will work a marvelous change in the neighborhood of these tracts, so that they promise greater and speedier advance in prices than any other suburban property.

One of these 10-aere tracts will, in a few years, make the fortunate owner thereof an independent, if not a wealthy, man. The time is limited.

These tracts are disappearing from the market. You can not afford to wait.

THAT "ROBBER" TARRES.

How the South Benefits by the System It Freely Denounces. How the South Benefits by the System It
Freely Pencounces.

Augusta, Ga., Chronicle (Bem.)
General Toombe pithily said that figures did
not lie when properly used. The Charleston
Nebs and Courter and other low teriff and free
trade papers are constantly damning wil at they
are pleased to call the "robor tariff." But the second of the following the second of the first of the southern reader is left under the impression that
he is constantly plundered by this tariff, and, the feet constantly plundered by this tariff, and, the low tariff and free trade year, read the logic of the
low tariff and free trade year, read to look one of
the stolen goods. Of the \$215,65891 following the
States during 18th and 190,000 of within \$11,000,000
of one-third of the benefit of Southern farm production of the property of the stolent of the third of the stolent of th wenty four hours included 3,000 cits wheat, By server fetter, 200 cits was 5400 ake potations, search larley. The freight market for the past went hardeness. The freight market for the past went hardeness and are asking higher are the appropriate for grain tonnage. Owners are the appropriate for justified in paying, each state the appropriate for justified in paying, each shatter for the week have been as followed an electronic for the week have been as followed and shatters for the week have been as followed and shatters for the week have been as followed and the state in the season of the control of the state of the season of the season

squal to the chiles sollected by the government of the custom-house;
Of all, the se-called robbertes of the tariff the rice imposition is the most guantic, and yet the Mess and Cherier is as dumb as an eyster on this question. The teriff is denounced as a robbery, but the greatest of all protected articles goes without protest or complaint from our Charleston contemporary. In all lairness the Mess and Cheriff cannot be effective in its proteins against the tariff-until at is consistent and calls for the kindle of reforms and reduction to be splitled to rice as well as to other articles. And when this is done what becomes of the rice planters of Georgia and Scuth Carolina?

Agricultural College Buildiage
Benton Leader.
The contracts have been let for the students'
formitors and hall, and the barn, and the mechanical hall at the Agricultural college. Willtem Butler secure it the outract or the downitors iam Butler secure that ontract to the formitury and barn. The contract piece of the former is \$5000, of the security of the of the former is \$5000, of the security of the security. John Huffman got the contract of the security of the the security of the contract s were signed Saturday and the work will begin at one, so as to have the buildings c mpleted for the fall term of the college. The mechanical hall will be of brick; the other to of wood. The brick building is designed for teaching mechanics or the branches related thereto in a practical manner.

Where Will Dr. Sellivan and Professor

Kilrais Meet?

New York Tribune.

We trust that our readers have not fornotten that Dr. Sellivan, of Boston, and Professor Kilrain, of Philadelphia, have a meeting soon in the interest of he noble art of soil-delease for #20,000 a side. If any should have been so forge ful, this will serve to bring the fact again to their recollection. One of the important words and ing up to this meeting has just occurred. It is nothing less than the decision as to which of the two gentlements all be allowed to the place where the dehate san loome of This point was settled with the assistant one of allowed to the place where the dehate san loome of allowed on the place where the professor. A critical examination showed that it was heads, and the professor will have the privilege of sale citing the location in the twenty-four-foot rostrem. The country awaits the decision with anxiety.

Had our old friend the doctor bean so fortunate.

thrill of pride over the distriction; conferred upon it.

The thoughtful and conservative dader will observe that the meeting has not taken place anywhere as yet. These scientific exhibitions of the manly art have, in time past, been planned only to fail through. The doctor, being a liferacy many decide to deliver all his up acc cuts and the which is steel pen and a sacet of art white maper; while the professor may conclude districtly the stringing left-hunders and in place to the while the professor and in place. But let us hope that this migrapering eso. There are a greatmany people in this country who extractly trust that for may moct, and when they get dirrough that each may be very tied and never fight any more.

A COWARDLY MURDER.

District Attorner McGinn began h s address to be jury as 2.6. He said the evidence about to c improduced the behalf of the state, would prove fliff guillier deliberate minder. He went on the control of the state of the

cat speech. He said:
Theory of the defense is that Gdd is not that in falling Emu Weber he commitcerime whatever. There is no question that illed Weber; we admit that; but web was a material ting end of a life of ordine that he was a rive; dangerous and bad man in the comy; that his life was apen; in chelidion of courisso of public decency and contrary in laws and the company of the life was apen; in chelidion of public decency and contrary in laws and the company of the life was apen; in the community. Thompson devoted the fest of his speech to get that Olds is a peaceable man, but weber ed, junted, assentied and inquired him and increatency to kill him, and that the Killing are of self-defense.

ver intrastence to All film, and that the killing as an act of self-defense.

JOHN BOES SAV.IT.

The Brit witness was called at 3:15. He was pung John Boes, a bather, who was employed at ober's bather shop at No. 124 First street. He was with wheter when he shooting took place, he two deft the bather shop about 1 o'clock, alked up First street to Alder and out on that reet. They were going to lunch.

"On our way to the restaurant," said Joes, "we de Olds should against a free ping, in front of relaming the Perfance's store, on the northwest ories of Third and Alder streets. Olds was increasing south and as were reserted the street from the sits also we met him face to face.

"Weber did not see Olds until he was within fit-sm doctor him. He then, turned and made-a research to see which I do not recollect." Is another sement we waste right up to Olds, was said to see which I do not recollect. I have been wasted to was backing was.

Weller reguled: The was that do was said to see which I do not recollect. I have a waste of the sement we waste also been amound town hooting was to waste to see was the sement.

sated and head up his wight hand, which upped and uncless. Olds, was had been up with his wight hand he had been up with his wight hand he had he from specket, as out his revolver and he gas a hooding. And show was fred while the ment were seen other and missed where. Meler then to go up Alder street and as he did so Olds sain and I saw the dust by from the back of reast where the bullet struck. During the decomposition of the cost where the bullet struck. During the decomposition of the street with the toward Olds, who leaned over the body edithree more shots into it. Next, he walked the preserted form remarking at the same 'Now, you have got me.' right, he drew a handkerchief from his pocket and wiped his forehead and hat." HE PIRED INTO WEBER'S BODY.

HE FIRED INTO WEERI'S BODY.

M. G. Griffin, a real estate agent; H. F. Gudixson, a carpet dealer at No. 104 Third, street; Miss
Blanché Martin, a telephone operator, who lives
at No. 416 Third affect; R. D. Freeborn, a wall
paper dealer, William B. Tarner, a drug clerk,
and County Tressurer, Frank Hacke acy Vestiled to
seeing Olds stood over Welker's prostrate form and
cappy his revolver; into 'it. Dr. Fowell Revers
was in his affect, on the corner of, Third and Aider, and heart the shooting, but it was all over
before he could reach a window.
Dr. W. I. Saylor testified that three of the
grained were necessarily starjand the fourth dangrained when he cosmit is all and the fourth danrerous.

Corouser DeLin testified to holding the inquest and to finding a platol near Weber's body when it spices that the morgane.

Weber's test and revolver, Olde's weapon and a plate of the morgane.

Weber's test and revolver, Olde's weapon and a practice with the webper of the morgane weight found on the ground where Weber Chi said, samposed to have been chirried by him, briss weight sound to have been carried by nim, were offered in evidence.

EASALY ALIVE WITH SALMON. Charles Then Fish Above the Clantaman Matchery They Should So Allowed to Brance.

Tishermen have had a great deat of sport intely additing salmon in the Checkamas just above the said at the hatchery. [Some one fishing for front short time since, discovered that the long riffle above, the cam was alive with salmon, which fook the fly with avidity and furnished fine sport. The discovery was imparted to other fishermen and district number have gone up there alice and all hist good sport, some taking more than a decensalmen and enjoying great sport kiffing them. This was looked upon as a great discovery, and fashermen were delighted to know that at last Oreson salmon had become sufficiently of vilized to take at fly, and visions of unlamited salmon fashing in the fature danced before the eyes of the enraptured sportsmen. above the cam was alive with salmon, which took

to take a fly, and visious of unlimited salmon fashing in the future danced before he eyes of the enraptured sportsmen.

It was at length, discovered that the salmon exagint were steelhouts and silversides which have been up the drot and spanned and are now on their way back to the sen. The poor fish, checked in their course by the hatchery dam, have collected in hundreds lost above the sen, have collected for the sen the lost of the sen of the se

seory will not wash, because as all sales up from the sea to spaws, if soveral

species form this quite certain that the other NEWS FROM THE EAST S DE species do so litters is. The chinosk seconding the rivers later in the season and being larger, heavier fish are more lights to pecial in titors long and difficult journey and many more of there dead bodies are seen floating down the streams. Its quite certain, showever that many of them, return to the see, and life fish which are "stripped" to supply egg for the batchery probably to back to the sea, and if they were marked in some way they could be identified on their return, jend so settle this quession.

A fill way or chair of some kind should be constructed at once at the histohory dans to allow the file heavy it to get down the river.

PORTLAND'S STEADY STRIDES. How the Work on the Several New Buildings in

the Dity Is Progressing. The contract for completing the ave-story building being creeted at the corner of Third and take attracts by Hon. H. W. Corbett, for offices for the O. R. & N. Co., has been lot to Messre. Hobbirk & McKenzle, and work in bitch laying will be begun at once it The building, completed, will cust about 1116,000. It is to have a natural fluish throughout, the auditor and paymatter's rooms being finished

often. The dining room is nearly all lathed and the work of listing wash floor laying is being pushed in the implementation of listing wash floor laying is being pushed in the implementation of Margaam's opera home is going about a spill, More homes have been removed from the libertiness of the block and a gang of the ner beay ricaring. Off. rubbled and genige block.

Mayor Delanhmut's handsome brick and stone building on First steel is done rock for occupancy. It presents a very handsome appearance, and is a pattern for owners of property a that victuity.

SUSTAINED THE DEMURRER.

A. B. Borthwick and Walter M. Fraine are Relieved Prem Paying the Government \$96,000-An Important Case.

The following synopsis of a case recently decided by Judge Aliyn, of the Second Judicial district of the territory of Washington, will be of interest to many here:

In August, 1886, the United States commenced an action in the Second; united States commenced an action in the Second; united States commenced in the France, both extensively known in this city, to recover, a judgment for \$3.500, for Important on certain designated sections of landin that territory.

valley of the commons." The room assessive been constructed king that proposed part of the route.

The defendants' counsel, Colonels Frank V. Drake and John E. Wheel, of this city, at once flied a donurer to the lack San's complaint, taking the position that the corporation's habure did not operate to defeat the grant.

That the act of congress granting the lands to the company was a present grant, and insamuch as the act the state of the route down the valley of the Columbia, the grant was absolute and anote-pendent upon any redininary absolute and one-pendent upon any redininary as before a construction of the grant.

That, while the government might by legal presenting, raise the question of forelitine by reason of the milway company's neglect, and re-enter possession, yet till stors were taken by the government to forfest the grant, the right and title remained with the corporation, and Unc. Sam could not maintain an action for damage or treapses, against persons outing thister thereon.

The government insisted that by the failure of the Northern Pacific to construct that portion of the road, the grant to that extent did not take greet. It his point had not been adjudicated, and if was whall sayers form one of "arsit appression," and the court, who had had the matter under consideration for a considerable time, sustained the

demurrer.

This decision is one of great import, not only to Borthwick and Fraine, but to the government and railway companies. The case will probably be appeared to the supreme court of the territory and altimately reach the supreme court of the United States. But judging from a decision made by Justice-Field since this demurrer was submitted, the judgment of Judge Allyn will be sustained by she slighest triannal.

The Probable Resurrection of the Occe Flourish-

The reference made to the town of Umaillia in percap recaus some very interesting, facts in con-incation with flish one prosperous city. Iron-ted, the deta of its theoremation as a city, up to about 1875; these, robathythe livelicat them in England Oragon, and that is anying a goan deal, where it is considered that the period referred to includes an era that witnessed the rise and fall of many famous mining towns in what was then known as the Wester Comment.

seers on their line of march. At that time Uma-rillia was the distributing noist for Easteria Ore-yon, Washington, idaho, Montana and a large part of Unh, and enjoyed a commercial prestige that has not been equaled by any low in Easter Oregon, even to this day. It is chained by those who are in a position to know chat there was one to the state of the control of the chained by those who are in a position to know chat there was one trustness of over a million to blass a year. The ad-dition to the above, there were dozens of similer firms with a capital tenging from \$1000 to 100,000 each, and including among them such inaries as ar-Governor Moody, Harker Box, G. L. III.bard, F. M. Arnold, Judgo L. L. McAribur and many pithers who have since acquired distinction in the business and professional ranks of the facilities coast. And yet the form has been comparatively frestried for meanly fifteen years. The quies ion of whether Umatilis will see gives again and a sume its former place in the business world is one that reats wholly with the several railroad companies centering a way of the companies of the various railroad companies are called into requisition again as a trausporta-tion factor, nothing but the united efforts of the various railroad companies could prevent lima-titia from boomsing the great city of the

LARGE CARH SALES. The Efforts That One of Pertiand's Large Grocery Pirms is Making To Encour-age Low Prices.

we realize that it takes low prices and the very best goods to accomplish what we have set out to lio, and knowing this fact full well, we are prepared to meet your full expectations. We shall give our best thought, time and energies to the Interests of the prompt-paying, independent cash trade of Portland, and we take special pride in the increasing success of this grocery business so well established upon the sound and sensible principle of One Price and Cash! Prompt and sure seltlements are cash, and it has been our good fortuce to find a host of friends who have stood by us from the ver; first (and many new ones each month) never tailing to extend to us the courtesy of regular payments.

We appreciate the good will that is so often expressed, and we promise to all the best service in every department of our work, the best system of business and the choicest new goods from the best markets from Portland to New York.

We employ competent and polite help, shich fact enables us to invite you to call, in perfect confidence, knowing that you will receive a pleasant business welcombe under all circumstances, and knowing, also, that you will receive a pleasant business welcombe under all circumstances, and knowing, also, that you will receive a pleasant business welcombe under all circumstances, and knowing, also, that you will receive a Prophone, No. 425.

ELEGANT \$10.

AN ELEGANT RIG. One of the Latest Additions to the Pine Delivery

One of the greatest things in the way of a deliv-One of the greatest things in the way of a delivery wagon ever lurned out in this city, if not on the coast, is that of the Kniegerbacker Bettling Company, manufactured entirely here at home, in the shops of F. Thunander, the well-known enriagemaker, whose works are localed at the southeast corner of Fourthle and ask streets. No hack that is over seen on the streets of Portland has a handsomer or richer exterior finish, and it is a credit at once to bir. Thinnauder and the firm for whom it was manufactured.

We are prepared to make loans on choice icity property at 6 per cent, with privilege of ipaying installments. Jarvis-Conklin Mortgage Trust Uo., 334 Mortson street.

For quick raising, the Royal Baking Powder is superior to all other leavening agents. It is absolutely pure and wholesome and of the highest leavening power. It s slways uniform in strength and quality and never fails to make light, sweet, most palatable and nutritive food. Bread, biscuits, must us, cake, stc., raised with Royal Basing Powder may be eaten hot without distressing results to the most delicate digestive organs. It will keep in any climate without deterioration.

Prof. H. A. Mott, U. S. Government Chemist, after examining officially the principal baking powders of the country, reported:

"The Royal Baking Powder is absolutely pure, for I have so found it in many s,s made both for that company and the United States Government.

"Because of the facilities that company have for obtaining perfectly pure cream of tartar, and for other reasons dependent upon the proper proportions of the same, and the method of its preparation, the Royal Baking Powder is undoubtedly the purest and most reliable paking powder offered to the public.
